## INSTRUCTION FOR USE OF PARTS CATALOGUE

This parts catalogue is compiled all service parts and flat rate time (F.R.T.) for models MT50SA, MT50SB, MT50Sc, MT50SE, MT50SF, MT50SG, MT50SH and MT50SJ.

The languages used in this parts catalogue are arranged in alphabetical order in English. (English—German—Spanish)

## I. How to order parts

## 1. Information required

Replacement parts orders must contain both the part number and the stamped number (s) as described below. This is because any changes and modifications of parts are registered at HONDA with the pertinent parts and stamped numbers.

**Numbers needed:**

- (a) Carburetor parts: Part number and  
Stamped carburetor identification number
- (b) Engine parts: Part number and  
Stamped engine number
- (c) Frame parts: Part number and  
Stamped frame number

## 2. Revisions

When modifications or additions to this parts catalogue are made, a revised edition will be issued at an appropriate time, with successively progressing revision numbers on the cover.

We recommend obtaining such revisions in order to keep your parts catalogue up to-date at all times. To check whether a parts catalogue revision has been issued, please contact your HONDA distributor.

The asterisk (\*) in front of "Ref. No." indicates that the part No. is added or changed against the previous edition.

## II. How to read this parts catalogue

### 1. Make-up of the part number

(Example) General parts

(Example) Bolts, nuts and other standard parts

## 2. Color codes

The color code at the end of the part number indicates the color. Codes below ZA in alphabetical order (such as ZA, ZB, ZC, etc.) do not indicate the color directly, but reference must be made to the HONDA code given in the "Description" column of this parts catalogue.

| Color code |            | Color description |
|------------|------------|-------------------|
| Parts code | HONDA code |                   |
| A          | NH-0       | White             |
| B          | NH-1       | Black             |
|            | NH-24      | Ceramic white     |
|            | NH-105     | Mat black         |
|            | NH-138     | Shasta white      |
|            | R-23       | Tahitian red      |
|            | R-119      | Flash red         |
|            | R-134      | Fighting red      |

### 3. Abbreviations

The following abbreviations are used in this parts catalogue.

|                              |                                           |
|------------------------------|-------------------------------------------|
| ASSY. .... Assembly          | L.E.D. .... Light emitted diode           |
| COMP. .... Complete          | MPH .... Miles per hour                   |
| R. .... Right                | L (100L) .... Link (100Links)             |
| L. .... Left                 | A.C. .... Alternating current             |
| STD. .... Standard           | D.C. .... Direct current                  |
| MM .... Millimeter           | IN. .... Inlet                            |
| G .... Gram                  | EX. .... Exhaust                          |
| T (22T) .... Tooth (22Teeth) | FR. .... Front                            |
| A .... Ampere                | RR. .... Rear                             |
| V .... Volt                  | HEX. .... Hexagonal                       |
| W .... Watt                  | A.M. .... Attaching mark                  |
| WL .... With labelling       | T.M. .... Transcript mark                 |
| WOL .... Without labelling   | C.D.I. .... Capacitive discharge ignition |
| KPH .... Kilometers per hour |                                           |

### 4. Dimensions

All dimensions are given in millimeters (mm) except in the case of steel balls, tires and tire tubes.

| Parts        | Example | Interpretation                                             |
|--------------|---------|------------------------------------------------------------|
| Bolt (Screw) | 6×12    | 6mm diameter, 12mm length                                  |
| Pin          | 8×14    | 8mm diameter, 14mm length                                  |
| O-Ring       | 9.5×1.6 | 9.5mm diameter, 1.6mm thickness                            |
| Oil seal     | 14×24×5 | 14mm inside diameter, 24mm outside diameter, 5mm thickness |
| Tube         | 5×130   | 5mm inside diameter, 130mm length                          |

### 5. Supersedance of parts

Part numbers given under the part name in the 'Description' column indicate that the part number has been superseded by that part number. HONDA may make such supersedence without notice.

### 6. Assemblies

Sections framed with broken lines in the exploded view drawings are available as complete assemblies. (Their individual parts can also be obtained.)

### 7. Required quantity

The number given in the "Reqd. No." column indicates the quantity of parts used in the section described in that block.

Parts with quantities in ( ) represent optional parts.

Part whose required number is "N", is part whose required number can be selected at need.

### 8. Part modifications and applicable serial numbers

In cases where a part has been modified, the serial number of the first vehicle (or frame, engine, carburetor) bearing the modification is listed in the "Serial No." column.

### 9. Illustration

Illustration of parts given in parts catalogue diagrams are provided for convenience in identifying parts and may differ from the actual configuration of parts.

# 10. Models, area codes and applicable serial numbers

Models, area codes and applicable serial Nos. given in this parts catalogue can be identified as follows.

Parts with area codes are exclusive for models destined for countries designated.

If no area codes are listed, parts are for common use.

| Model              | Area code | Type             | Applicable engine serial No. | Applicable frame serial No. | Applicable carburetor identification No. |

**12. Selection table for lock or blank key**

Refer to the following selection table to select the lock or blank key.

| Type   | Key No.     |
|--------|-------------|
| TYPE 1 | *01 ——— *20 |
|        | A** , B**   |
| TYPE 2 | *21 ——— *40 |
|        | C** , D**   |

\*: 0, 1, 2, 3, 4, 5, 6, 7, 8 or 9

**B 7**

### 13. Color label

- When ordering parts, check the model name, main color, and code by observing the color label on the vehicle.
- When ordering a colored part, use the Color Chart in the INSTRUCTION FOR USE OF PARTS CATALOGUE.

| MODEL |                         |                | MT50Se            |                       |                          |                        |           |                        |

# 14. Color chart

- When ordering a colored part, refer to the chart below and use a part number consisting of the relevant basic part number to which has been added a part color code.  
(e.g. If a front fender whose main color is flash red is required -> 61100-167-000ZD)
- Stripes and labels other than caution labels are included in parts whose part name end in WL.
- Stripes and labels are not included in parts whose part name end in WOL.

### III. How to use the flat rate time (F.R.T.)

This F.R.T. (Flat Rate Time) is used to determine the standard labor time allowed for replacement of parts covered by the warranty during the period the warranty is in effect. The F.R.T. for those parts which are not listed herein should be determined from the operation closely related to the replacement of that part.

#### 1. The F.R.T. is based on the following servicing conditions

- A liberal allowance is added to the net servicing time.
- Standard times specified are based on the condition that the necessary servicing tools listed in the service manual (motorcycle) which describes the HONDA service policy are available close at hand and the work performed by a mechanic with normal skill.
- Time required for inspection and operational test following the servicing is included in the F.R.T.

#### 2. Method of computing

The job times are listed in tenth of an hour to simplify computation.

(Example) 0.3 = 18 minutes

5.6 = 5 hours and 36 minutes

| CONVERSION CHART |         |       |         |
|------------------|---------|-------|---------|
| Hours            | Minutes | Hours | Minutes |
| 0.1              | 6       | 0.6   | 36      |
| 0.2              | 12      | 0.7   | 42      |
| 0.3              | 18      | 0.8   | 48      |
| 0.4              | 24      | 0.9   | 54      |
| 0.5              | 30      | 1.0   | 60      |

#### 3. Computing the F.R.T.

When several jobs are performed at the same time, make the calculation in the following manner.

##### a. Jobs of non duplicated nature

The F.R.T. for the job is obtained by totalling the F.R.T. for each part replaced.

(Example) Replacement of cylinder and clutch spring.

| Service item  | F.R.T. |
|---------------|--------|
| Cylinder      | 1.0    |
| Clutch spring | 0.6    |

The F.R.T. for the job is:  $1.0 + 0.6 = 1.6$

##### b. Jobs of duplicated nature

Take the F.R.T. for the last part to be replaced.

(Example) Replacement of piston and cylinder head gasket.

| Service item         | F.R.T. |
|----------------------|--------|
| Cylinder head gasket | 0.4    |
| Piston               | 1.0    |

The F.R.T. for the job is: 1.0

##### c. Jobs of partially related nature

Total up the F.R.T. for all of the parts replaced and then subtract the F.R.T. for the duplicated operation.

(Example) Replacement of gearshift drum and crankshaft assembly.

| Service item          | F.R.T. |
|-----------------------|--------|
| Gearshift drum        | *2.9   |
| Crankshaft            | *3.3   |
| Crankcase disassembly | *2.8   |

The F.R.T. for the job is:  $(2.9 + 3.3) - 2.8 = 3.4$

Crankcase disassembly is the duplicated operations.

● The F.R.T. shown with (\*) includes engine removal and installation.

# B 15

## 4. Operations other than replacing parts

### a. Removal and installation

| No. | Service item  | F.R.T. |
|-----|---------------|--------|
| 1   | Engine        | 1.1    |
| 2   | Cylinder head | 0.4    |
| 3   | Carburetor    | 0.4    |

### b. Adjustment, measurement and cleaning

#### Engine

| No. | Service item                                  | F.R.T. |
|-----|-----------------------------------------------|--------|
| 1   | Mission oil-inspection (excluding oil change) | 0.1    |
| 2   | Cleaner element-cleaning                      | 0.2    |
| 3   | Compression-pressure measurement              | 0.1    |
| 4   | Spark plug-adjustment and cleaning            | 0.1    |
| 5   | Ignition timing-inspection                    | 0.2    |
| 6   | Throttle operation-adjustment                 | 0.1    |
| 7   | Carburetor idle-adjustment                    | 0.1    |
| 8   | Carburetor-float level measurement            | 0.6    |
| 9   | Clutch-adjustment                             | 0.1    |
| 10  | Oil strainer-cleaning                         | 0.2    |
| 11  | Oil pump air bleed                            | 0.2    |

#### Frame

| No. | Service item                                                                 | F.R.T. |
|-----|------------------------------------------------------------------------------|--------|
| 1   | Front brake-adjustment                                                       | 0.1    |
| 2   | Rear brake-adjustment                                                        | 0.1    |
| 3   | Brake-operation test                                                         | 0.1    |
| 4   | Headlight-aiming                                                             | 0.1    |
| 5   | Drive chain (includes tension adjustment however, does not include sprocket) | 0.1    |

### c. Overhaul

| No. | Service item | F.R.T. |
|-----|--------------|--------|
| 1   | Carburetor   | 0.7    |

● This parts catalogue is compiled as of September 20, 1987.
