Yamaha parts are divided largely into two categories; general parts and standard parts, and each part No. has the following structure:

General Parts

Model code No. _____
Basic code No. _____
Design code No. _____
Design change code No. _____
Color code No. _____

Standard Parts

Major classification _____
Type _____
Material, surface finish _____
Shape, size _____

2. How to Use this Parts List

- (1) Except for steel balls (whose size is indicated in inches), the size of all parts is indicated in millimeters in the following manner.

Hose (rubber or vinyl) Inside diameter - length
O-ring Section area - inside diameter
Washer, shim, collar Inside diameter - outside diameter - thickness (length)

- (2) Parts, which are to be supplied in the form of assemblies, are listed with an indentation of one letter's space, and a dot (.) is put

against the name of each part. If any two different assemblies (e.g., right and left side components) consist of almost the same type components, these two assemblies are listed in two lines, and then the names of component parts are listed in the subsequent lines with an indentation as mentioned earlier. The quantity of parts is given in the following manner; that is, in the case of parts being the same in type between the right and left, a total quantity of parts is given. On the other hand, if the right and left side parts are different in type, the quantity of part(s) on each side is given.
